

THE SLURRYPRO[®] COBALT RANGE

A range of single and dual stage centrifugal slurry pumps designed for high pressure silt feed

- Superior performance
- Competitive rates
- Pumps and parts available on short lead times

SLURRYPRO[®] - A BETTER SLURRY PUMP EXPERIENCE

SlurryPro originated from a firm belief that your slurry pump experience could and should be better. With this in mind we are proud to present the SlurryPro Cobalt range.

Built for the mining and quarrying industry, this new range of high pressure slurry pumps offer superior performance and are ideal for high pressure abrasive applications such as filter press feed.

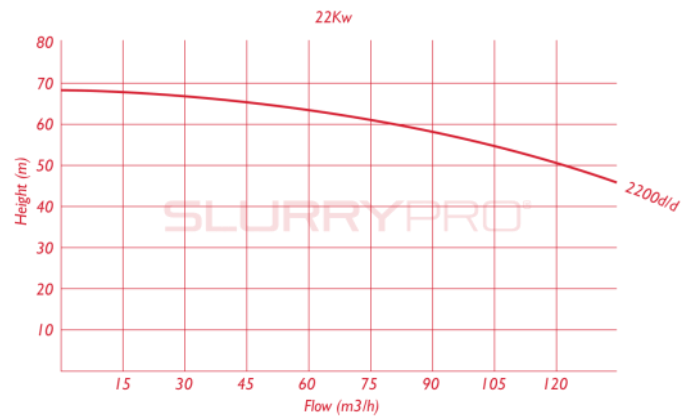

The single stage centrifugal slurry pump offers a pressure rate up to 7 bar while the dual stage pump delivers a maximum of 14 bar. Both Cobalt pumps offer a flow rate of up to 115 m3/h.

Offered at very competitive rates, stocks of both pumps and spares are held at Atlantic Pumps' Sheffield depot.

In short, if you're looking for a better slurry pump experience, including superior wear life, reduced lifetime cost and ease of ongoing maintenance there is quite simply no alternative to SlurryPro and the new Cobalt range.

For further details on the SlurryPro Cobalt range, contact Atlantic Pumps on 0800 118 2500, email info@atlanticpumps.co.uk or visit atlanticpumps.co.uk.
